

WATER THAT WORKS!

H2Fuel is the mobile companion to Vollara's market-leading, Living Water healthy home technology. H2Fuel makes it easy to have hydrogen-rich hydration anywhere you go!

H2Fuel charges your water to deliver electron-rich, hydrogen-infused hydration to your cells to flush cellular waste and toxins from your cells! If you're going to drink water, doesn't it make sense to drink water that works vs. water that doesn't?

H₂FUEL

PERFORMANCE HYDRATION BOTTLE

SUPERIOR HYDROGEN HYDRATION TO FUEL YOUR LIFE!

Water naturally charged by the earth is rich in molecular hydrogen and has anti-oxidant properties. H2Fuel charges your water to produce anti-aging, electron-rich, hydrogen-infused water. Now you can enjoy charged water everywhere you go with H2Fuel!

TAP AND BOTTLED WATER HAS NO CHARGE!

Chemically treated water sent through long pipes loses its natural electrical charge. Overprocessing also strips water of electrons – so it loses its natural ability to fight oxidation, aging and inflammation.

DRINK ELECTRON-RICH CHARGED WATER!

Artesian and underground flowing water are rich in energy, electrons and molecular hydrogen. These properties give natural anti-aging and physical energy to water. Drink charged water to give you natural energy and balance.

CONSUME CLOUDY!

The cloudy or milky appearance is an abundance of H₂ gas, representing the water's greatest energy and anti-oxidant potential.

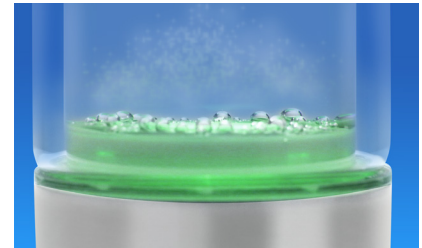

The H2Fuel charges water through electrolysis, giving it added electrons and molecular hydrogen to create water that works.

75% OF AMERICANS SHOW SIGNS OF CHRONIC DEHYDRATION.

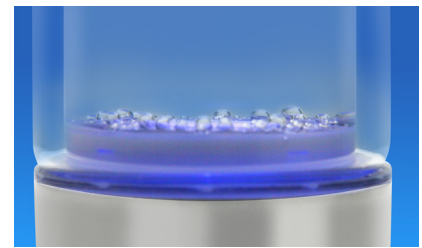

Intracellular hydration is fundamental to health and energy! H2Fuel uses electrolysis to infuse an adjustable amount of activated hydrogen (H₂) into drinking water to increase intracellular hydration and reduce oxidation associated with physical exertion and aging.

SPECIFICATIONS

Model	H2Fuel (W2000A)
Size	9 1/4" H x 2 1/2" W
Weight	390 g
Output	DC5V 1A
Capacity	380 ml
Hydrogen (H ₂)	0-999 ppb
ORP	-250 ~ -650 mv

A green light indicates the unit is in operating mode and hydrogen bubbles will rise from the bottom of the bottle.

A blue light indicates the unit has reached its set time (3-5 minutes) and is in standby mode.

TASTE AND FEEL THE DIFFERENCE!

Enjoy the smooth, light and satisfying taste of H2Fuel enhanced water for optimum hydration and performance.
